DETAILED ACTION

This Office Action requiring Election of Species replaces the previous requirement for Election of Species mailed on April 29, 2008, due to further examination. The examiner regrets any inconvenience caused by this replacement.

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- 1) Purely mechanical/multidirectional arm featuring interlinked arm sections coupled together by motorized joints (reference figures 1-4)
- 2) Telescoping assembly featuring foldable aerodynamic surfaces (reference figure 5)
- 3) Rigid tube containing internally mounted conveyor mechanism and foldable aerodynamic surface (reference figure 6)
- 4) Externally mounted conveyor on mechanical arm (reference figure 7)
- 5) Conveyor arm with ordnance carriage cradle and guide bars (reference figures 8-9)

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

Art Unit: 4114

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

- 1) 2, 11, 12, 16, 17, 28-33 (reference figures 1-4)
- 2) 2, 7, 12, 14 - 17, 28-33 (reference figure 5)
- 3) 7, 18, 34 (reference figure 6)
- 4) 2, 11, 12, 16, 17, 19, 28-33, 35 (reference figure 7)
- 5) 7, 20, 21, 35, 36 (reference figures 8-9)

The following claim(s) are generic: 3-6, 8-10, 13, 22-27, 37-40.

As best understood by the examiner, Claim 1 does not appear to be generic and does not appear to be directed toward any of the particular embodiments, in light of the limitation "an ordnance transfer assembly moveable along substantially the length of the arm."

It should be noted that "ordnance transfer assembly" is unclear among each of the embodiments, as it is not clear what this assembly comprises with respect to the entire extendible arm assembly, and these species are based on the application as best understood by the examiner.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Art Unit: 4114

- 1) the purely mechanical arm of joints features a cradle mounted exclusively on the end of the arm
- 2) the telescoping arm features telescoping tubes and a notably exclusive arm configuration
- 3) the rigid tube inherently features no controllable joints
- 4) the externally-mounted tube features a feeder mechanism noticeably exclusive from the arm in species 1
- 5) the conveyor arm in species 5 features guidebars and no multidirectional movable joints as provided in species 1

3.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
